

Delivering the means and methods to reduce costs and provide schedule certainty.

With more than 20 years of experience in preconstruction and construction services for projects regulated by the Nuclear Regulatory Commission (NRC) under 10 CFR 50 and 10 CFR 70, Baker has honed a mature and tested NQA-1 quality program. This assures the proper construction of safety-related concrete structures.

Experience = Efficient and Effective

NRC-regulated facilities are subject to higher standards.

We combine specialized knowledge and leading-edge technology to satisfy the heightened security, economics, safety, quality, and traceability requirements of 10 CFR 50 and 10 CFR 70 projects. We mobilize experienced, qualified, and credentialed project teams to deliver innovative solutions and precision craftwork. Earned value management reduces risk on every project.

NUCLEAR PROJECTS

- Gen III Nuclear Power Plants (NPP)
- Small Modular Reactors (SMRs)
- GEN IV and Advanced Reactors
- Enrichment Plants
- Fuel Fabrication Plants
- Medical Isotope Production Facilities
- Used Fuel Storage Facilities
- Forensic Consulting
- Waste Management/Storage Facilities

Baker brings a strong financial foundation to all its projects.

Baker is backed by the extensive network, technology, and resources of our parent company, Baker Construction Enterprises (BCE).

BCE is the largest specialty concrete contractor in the nation. That means we can assemble the right team with the right expertise and equipment at anytime and anywhere.

BCE FINANCIAL STRENGTH

5 YEAR REVENUE

2025	\$3.00 BILLION
2024	\$2.36 BILLION
2023	\$2.30 BILLION
2022	\$1.97 BILLION
2021	\$1.46 BILLION

Let's discuss
how we can bring
more value to your
next project.
