

# Oil & Gas Companies Drive the Economy

O&G companies need updated facilities to meet industrial and energy demands

## Concrete Adds Safety, Stability, and Efficiency to Infrastructure Projects.

The U.S. economy relies on oil & gas (O&G) companies to drive industrial activity, which in turn creates jobs and reduces dependence on foreign energy. At the same time, policymakers demand cleaner technologies, such as renewable energies.

To get new projects off the ground, O&G companies must navigate a maze of changing regulations. Costs often escalate between initial budgeting and groundbreaking, resulting in projects that are overbudget from the start — or even postponed entirely.

Experienced concrete construction partners can help O&G companies successfully manage the competing pressures to produce more while operating more sustainably.

Concrete foundations and structures provide stability for processing units with associated heavy equipment, vessels, interconnecting piperacks, storage tanks, and the like in various challenging environments. With a long lifespan and relatively low maintenance needs, concrete can be more sustainable and cost-efficient over time. Optimized designs, low-carbon concrete, and locally sourced materials can also reduce environmental impacts.

## The Right Partner Matters

To reclaim time and money on their projects, O&G companies need crews and resources that can provide efficient sequencing and an uncompromising approach to safety.

Baker has nearly six decades of “turnkey anchor bolts down” experience, building everything from deep foundations to vertical above-grade structures. We’re known for:

### GETTING IT RIGHT THE FIRST TIME

Our craftspeople understand the demanding specifications, regulatory requirements, and safety protocols required by the oil and gas industry. They take pride in delivering flawless products safely and on schedule, whether it’s a clean concrete pad or the proper concrete mix.

Baker teams build quality and accountability into project plans and audits. We verify quality at every step to ensure targets are hit, and we leave jobsites ready for the next trades to keep timelines on track.

## COST AND SCHEDULE CERTAINTY

Baker can help reduce the risk of overruns and delays when we join other project partners at the planning table. In addition, We bring decades of refined, field-proven policies and procedures that govern every aspect of planning and execution. Modeling systems are used to create detailed documentation and finely tuned work packages for our crews. Our exceptionally detailed planning prepares crews to hit customer targets while reducing errors, overruns, or downtime in the field.

## EXTENSIVE RESOURCES

Our ability to execute is unmatched. Baker has at the ready a dedicated labor pool of 8,000+ co-workers with the right qualifications to work for any client across industries, from infrastructure to nuclear. Our workforce, coupled with equipment yards in strategic locations, enable our team to mobilize anywhere in the U.S.

## EXPERT COORDINATION

Early collaboration can improve cost certainty and lower risk. Once we understand the owners' goals, we can assist with everything from logistics and access points to work sequencing and constructability to drive aggressive schedules and seamless execution.

Our ability to execute multiple scopes of work provides greater control over schedules, quality, and risk. As a result, our clients have fewer trades to manage and coordinate.

## SAFE WORKSITES

Our teams have the training and commitment to meet the higher safety standards that govern oil and gas projects. We don't just meet baseline OSHA regulations; we exceed them. Our Incident and Injury Free culture is backed by proven processes and standards. Every Baker co-worker knows they are accountable for doing the right thing.

## Oil and Gas Projects

We serve general contractors, construction managers, engineering firms, and owners with honor and grit.

## OIL AND GAS MARKETS SERVED

Baker serves the upstream, midstream, and downstream markets for all O&G industries, such as:

- Air Separation Units
- Liquefied Natural Gas
- Petrochemicals
- Power Generation
- Refineries
- Terminals

## Dream Big, Build Better With Baker.

Baker Construction is the nation's leading concrete construction contractor. But we're more than just a concrete contractor.

Baker offers comprehensive industrial construction solutions in civil construction, underground utilities, deep foundations, structural and slab concrete, and concrete protection and restoration. With nearly six decades of experience, we bring a higher level of project management, quality assurance, and risk mitigation to every job site.

Put our experience to work for you. For more information and to discuss how Baker Construction can support your next project, contact us today.
