

Simplify delivery with integrated solutions.

Partner with a team that has the expertise, resources, and capabilities to deliver all major civil and concrete disciplines under one roof — without the barriers of working through a general contractor.

As an integrated industrial contractor, Baker Construction delivers full-scope solutions with complete transparency, faster coordination, and cost certainty. You gain tighter sequencing, aligned priorities, and measurable value — all from a single accountable team.

Comprehensive capabilities with less risk.

When the entire project scope moves through a general contractor, every extra layer adds coordination risk — more markups, more meetings, and more distance between decision and execution. The result: slower responses and misaligned priorities that can drive up costs and erode control.

With Baker leading delivery, you gain direct access to the people, plans, and data that drive results.

Our ability to self-perform multiple scopes of work brings a higher level of safety, project management, and quality assurance to every engagement.

CAPABILITIES

- Preconstruction
- Civil Construction
- Deep Foundations
- Specialty Concrete Floors
- Structural Concrete
- Underground Utilities/Duct Banks
- Concrete Protection/Restoration

Preconstruction intelligence.

Backed by decades of experience, our preconstruction teams deliver strategic insights that unlock greater value from day one.

We can provide value engineering, constructability, and site logistics services to boost efficiency, derisk handoffs, and avoid downstream issues.

Streamlined delivery.

With 8,500+ craftworkers and a national fleet of equipment, we can staff every project with the best skills and right experience for the job.

Our crews are trained to operate in remote, dense, and time-sensitive environments — mobilizing quickly, executing with consistency, and prioritizing safety.

Proven results.

Drawing on decades of experience in the industries we serve, we develop cross-discipline strategies that align with each project's specific demands.

Our detailed planning, work package development, and advanced technologies enable us to safely deliver to the highest quality standards, even on aggressive timelines.
